CANTS FROM NATURAL HISTORY WORKS (1975) by Gary W. Adkins. color/sound/14 min. WEST COAST PREMIER. Original text by Jorge Luis Borges. Spoken voice by Michael Guccione. First sound film in 3 years. Voice-over narration of a parable on Dante which is repeated 6 times. Subsequent repetitions are delinquent & bastard versions of the original containing apparent errors, additions & deletions. Image is composed of a two minute sequence (25 shots) which is also repeated 6 times in various disguises & alterations. Repetition of Image/Sound is in staggered manner with film beginning in darkness/sound and ending in light/silence. Problems of a language & the nature of memory. The film doesn't progress or evolve, but rather simply allows an awareness of certain changes.

NEW YORK--MIAMI BEACH (1975) by Virginia Ginitlian. black & white/sound/8 minutes. PREMIER. This film contains my impressions of a cold, dark city and its warm suburb, the plastic city in which I grew up. -VG

SLICED LIGHT (1976) by Joel Singer. black & white/silent/15 min. PREMIER.

THE FACTS IN THE CASE OF M. VALDEMAR (11.83 MIN. VERSION) (1976) by Janis Crystal Lipzin. color/sound/ 11.83 minutes. PREMIER.

A minimal concept film with a sense of humor. The idea develops from the contrast of visual mesmerism and random repetition with the process of shooting a sync-sound film. The culmination of a day at the San Francisco Public Library with Franz Anton Mesmer, an

evening with Edgar Allan Poe, a morning with beginning film students, a Sunday at the Alameda Flea Market, and a year-and-a-half living with the "mystery bump 'n' go." -JCL

PORTER SPRINGS (1975) by Henry Hills. color/sound/12 minutes. Filmed in Georgia in August. -HH

LEADING LADY (1975) by John A. Carlson. color/sound/6 minutes. PREMIER. A documentation of the process of filmic entropy and an homage to my muse, the leading lady of leaders. --JAC
